PROJECTS

Project #1: Personal Portfolio
Used Technology: HTML, CSS, JavaScript, GitHub
Developed a personal portfolio website to showcase my skills and projects, utilizing responsive design principles to ensure a seamless user experience across devices.

Project #2: Advanced Personal Portfolio
Used Technology: HTML, CSS, JavaScript, GitHub, WordPress
Enhanced my personal portfolio by integrating WordPress for dynamic content management, allowing for easier updates and improved functionality while maintaining a polished design.

Project #3: Online Guitar Shop
Used Technology: HTML, CSS, JavaScript
Created a fully functional online guitar shop, focusing on user interface and experience to provide a seamless shopping experience for users.

Project #4: Web Application Development
Used Technology: Angular, Angular CLI, GitHub
Built a robust web application using Angular, applying the Angular CLI for project scaffolding and showcasing skills in version control and collaboration through GitHub.

Project #5: Talk With Me (Mobile App Prototype)
Used Technology: Figma
Designed a low-fidelity prototype for a mental health companion app, emphasizing user experience and interface design principles to create an engaging and user-friendly mobile application.
